

This free 3D desktop wallpaper website is designed mainly for high resolution computer screens and is compatible with most modern browsers.

Over the years 3D Poetry has posted hundreds of images designed to personalise computer desktop backgrounds. The desktop wallpaper themes range from Gothic through to fairies, science fantasy through to optical illusions.

The 3D desktop backgrounds on this site vary from detailed portraits to complex scenes, both life like and extreme fractal.

3D Poetry has had many face lifts over the years and will continue to do so, because we believe in constantly trying to better ourselves and to keeping up with the chaotic pace of the internet.

**You are free to come and roam as you may,
To peruse the site, and enjoy the day.
And if you like what you see,
Telling your friends is the only fee.**

Welcome, to 3D Poetry.
